PROFESSIONAL SUMMARY

Data Engineer with 7 years of experience in Python development and 6 years in data analysis. Expertise in designing and optimizing ETL pipelines, data modeling, and developing analytical solutions using SQL and Power BI. Significant experience in improving query performance and creating decision-making dashboards. Continuously training on emerging technologies (Snowflake, DBT, Azure Data Lake).

TECHNICAL SKILLS

- **Data Analysis & ETL:** Python (Pandas, Matplotlib, Seaborn), ETL, Data Modeling
- **Databases:** SQL, PostgreSQL, NoSQL (Cassandra, MongoDB), Snowflake (in progress)
- **Business Intelligence:** Power BI (DAX & M languages, UI rules, queries/measures/columns/groupings, dashboards), Tableau, Dataiku DSS, dashboard creation. Knowledge of Power Apps, Power Automate, and SharePoint lists.
- **Cloud & Data Lakes:** Azure Data Lake (ongoing LinkedIn Learning training)
- **Testing & Performance:** Unit/Integration testing with pytest, optimization with cProfile
- **DevOps & Automation:** Docker, Git, Jenkins, PowerShell, Linux Shell, Portainer
- **Methodologies:** Agile approach, ETL practices, data integration
- **DBT:** Deployment in virtual environment and Docker (personal project)

PROFESSIONAL EXPERIENCE

Segula Technologies Canada | October 2024 – June 2025 *Data Engineer / Data Analyst*

- Collaborated with business analysts to define and implement data models tailored to HR, Sales, and Quality needs.
- Designed and optimized data pipelines between various sources and Microsoft Power BI.
- Created analytical dashboards and KPIs (creation of measures (aggregation, ratio) and tables (including calendar table) using DAX).
- Applied performance testing to optimize queries and improve processing times.
- Project Management: MS TEAMS, MS Project, SharePoint in Agile mode with weekly sprints.
- Technical Environment: Windows 11, SharePoint, MS SQL Server, Python Notebooks, Power BI, GitHub.

Airbus Atlantique Canada | March 2023 – October 2024 *Data Engineer*

- Developed and optimized ETLs in Python for data integration from SAP and PLM.
- Designed data models adapted to business requirements (HR, Finance, Quality, Production).
- Automated data flows for Power BI dashboards (queries in DAX), reducing data preparation time by 40%.
- Implemented unit and integration tests to ensure data pipeline quality.
- Collaborated closely with stakeholders to define analytical requirements and KPIs.
- Project Management: Airbus Kanban tool, Google Meet, MS TEAMS, MS Project, SharePoint in Agile mode with weekly sprints.
- Technical Environment: Windows 11, Google Docs & Google Suite, Python 3.10, Pandas, Git with Gogs, Power BI, SAP (SAP Logon), PLM, Airbus Synapse.

Arche TI, Canada | January 2023 – February 2023 *Python ODOO Developer*

- Adapted client interfaces according to specific business needs.
- Created custom modules optimizing data flows between applications.
- Project Management: Odoo project management module with Kanban, ticketing, and wiki; Rocket.chat for communication in Agile Scrum mode with weekly sprints.
- Technical Environment: Linux Ubuntu, PyCharm, Odoo (CE & EE).

Epsilon-ALCEN for client Generale du Solaire, France | February 2022 – August 2022 *ODOO Developer*

- Created a document management application (legal acts, miscellaneous documents) and a project management tool for the creation of a photovoltaic solar power plant.
- Created document management and project management modules with Kanban and pop-up alerts.
- Wrote requirement specifications for the first application deliverable.
- Technical Environment: Linux Ubuntu, VSCode, VPS OVHCloud, Epsilon GitLab, ODOO (CE & EE).

Groupe La Poste, France | October 2021 – February 2022 *Data Analyst / Data Engineer*

- Designed and developed ETL pipelines for the postal data warehouse.
- Created interactive dashboards with Python (Streamlit, Folium).
- Optimized SQL queries to improve analysis performance.
- Applied ETL methodologies and adhered to data quality standards.
- Used BI tools (Tableau, Power BI) to create visualizations (including geographic maps) and DAX measures for geographic data conversion.
- Project Management: Kanban, Confluence, JIRA as documentation wiki, TEAMS for communication in Agile Scrum mode with 2-week sprints.

- Technical Environment: Windows, Dataiku DSS, Power BI, Tableau, Python 3.9, PostgreSQL, MS SQL Server.

Université Paul Valéry, France | September 2018 – September 2021 *Part-time (Groupe La Poste 50% - Université Paul Valéry 50%) | Study and Development Engineer*

- Developed Python applications and APIs for the extraction and analysis of medical data.
- Designed data models adapted to scientific research.
- Optimized queries and performance of deep mining applications.
- Used NoSQL technologies (AstraDB) for storing and analyzing large volumes of data.
- Project Management: Kanban, Trello, GanttProject, and Slack for project management and team communication in Agile mode with weekly sprints.
- Technical Environment: Dual boot Windows/Debian, Python 3, Pandas, Excel, University Cloud tools.

VOLUNTEERING & COMMUNITY INVOLVEMENT

HiTi Communities in Montreal, Quebec, and Canada

- **Member of the Organizing Committee for Linux Meetings in Quebec (Rencontres Linux Québec)** https://www.rencontres-linux.quebec/en_CA/comite-organisateur-2026
- Preparation of the annual "Rencontres Linux Québec" event for September of each year for Software Freedom Day.
- Technical presentations for meetups and clubs with videos on YouTube and Twitch for organizations: Rencontres Linux Québec, Les Pinguoins du Monde, Montréal Python, 3W Québec. (See portfolio on Github)
 - <https://youtu.be/CLvNW-Gi4ps?si=mPqOFUtI2hKTPmKd>
 - <https://youtu.be/buVWg8tKyFk?si=R5pybJ90LJRFfXOA>
 - https://youtu.be/r3eq8y6_fWw?si=fCMrUKKsXLz_41gB
 - <https://www.youtube.com/watch?v=livgqbzDXxg&t=302s>
- **Les Pinguoins du Monde:** https://www.youtube.com/@Les_Pinguoins_Du_Monde/streams

EDUCATION

- **Data Analyst Certification** | Groupe La Poste-Simplon, France – 2022
- **Engineering Degree (Formation Ingénieur)** | Conservatoire National Arts et Métiers (CNAM), France – 2021
- **Bachelor's Degree in Computer Science (Licence Informatique)** | Conservatoire National Arts et Métiers, France – 2017
 - Equivalent to a first-cycle university diploma in computer science.
- **BTS (Higher Technician Certificate) in IT Services for Organizations** | GRETA, France – 2015

PERSONAL PROJECTS & PROFESSIONAL DEVELOPMENT

- **Community Developer** for Patrii.ca PatriCloud open-source projects: Lynx (Patrii).
- **Upskilling** as a community developer on Recalbox and Pandas projects.
- **Local Gen AI Creation:** AI stack tools in Podman containers with OpenSource LLM gguf files (see portfolio presentation 3w_Quebec).
- **DBT Snowflake Training:** Self-training on Snowflake architecture and usage for data analysis (in progress), participation in workshops, meetups, and events.
- **Self-training & Upskilling:** Microsoft tools (PowerApps, PowerBI, Fabric, Azure).
- **Self-training & Upskilling:** Data Analyst with ClickHouse and containerized database environments for simulation, testing, and pipeline creation (ETL-ELT).
- **Self-training:** Mainframe COBOL Development on IBM z/OS (In progress).
 - *Training Goal:* Upskilling in COBOL programming language.
 - *Technical Project Goal:* Data structures, sequential file management (VSAM/PS), and control instructions.
 - *Application:* Practical implementation through a tax processing simulation project for Revenu Québec, including contribution calculations (RRQ, RQAP), application of tax brackets, reading taxpayer files, and generating reports.

Self-taught and passionate about hardware, Open Source, and the annual FOSSDEM event (Free and Open Source Software Developers' European Meeting).

LANGUAGES

- **French:** Native
- **English:** Advanced – Professional
- **Spanish:** Intermediate

PROFESSIONAL QUALITIES

- Technical curiosity and fast learner regarding new technologies.
- Excellent communication and teamwork collaboration skills.
- Autonomy and proactivity in problem-solving.
- Balance between rigor, thoroughness, and results orientation.
- Adaptability and versatility facing technical challenges.
